

Your membership in ACEC and ACEC/CT will enable your firm to tap into a variety of benefits

Government Affairs

ACEC/CT's lobbying efforts enable members to monitor and impact important legislation in Hartford and Washington, D.C. ACEC/CT's and ACEC's regulatory tracking systems will keep you up-to-date on the constant changes that affect your profession and your business. When it comes to rolling up our sleeves, ACEC/CT stands ready and able to fight for your profession in the Congress, the state capitol and in the courts. The DOT, DEP and DPW Liaison Committees offer firms an opportunity to influence department policies and procedures. Your input will help build a more rational legislative and regulatory environment for consulting engineering firms.

Coalitions

Although all ACEC/CT members are in the consulting engineering business, they represent a variety of technical disciplines with unique concerns. The Structural Engineers Coalition and the Geotechnical Engineers Coalition address these issues and offer networking opportunities among your peers. The Dispute Resolution Coalition offers mediation and Dispute Resolution Board services to the construction industry and promotes resolution and avoidance of problems before they end up in court.

Engineer Selection

ACEC/CT has joined with architects and land surveyors to promote the use of Qualifications-Based Selection (QBS) of design professionals. As a member of the Connecticut QBS Council, ACEC/CT promotes QBS and provides facilitators to explain how it works to public and private owners.

Meetings and Seminars

ACEC/CT conducts a variety of seminars and workshops to train you and your staff. At ACEC/CT meetings you interact with other consulting engineers, and network with owners, government agencies, architects and other possible clients.

Publications

ACEC/CT publishes an electronic newsletter every month and a daily web blog to keep our members informed. In addition, ACEC/CT also distributes information about state design projects and legislative issues by email. Our business publications, surveys, etc. are valuable resources to any firm.

Image

Your success depends on your image among other design professionals, government leaders and owners. ACEC/CT actively promotes the profession through the Engineering Excellence Awards program, articles and interviews in newspapers and tools firms can use to improve their own public image.

Insurance and Risk Management

ACEC/CT and ACEC offer a variety of programs to reduce the liability of our members. Educational programs, peer reviews, contract documents, and publications allow firms to reduce their risk and lower their professional liability insurance premiums. Business insurance programs offer group life, health, workers compensation, property and casualty insurance savings for members.

National Connections

When you join ACEC/CT you're also joining the American Council of Engineering Companies, our national organization for consulting engineering firms. You'll tap into ACEC's network of referrals, information, seminars, etc.

What Your Peers Say...

“ACEC/CT provides the forum which enables me to meet regularly with my professional colleagues and exchange ideas on matter of mutual interest and concern. ACEC/CT is working for me.”

Lois Roberts, P.E.

*Lois Roberts & Associates, Westport
Sole Proprietor*

“ACEC/CT speaks for our profession in ways that individual firms cannot. It is imperative that we, as professionals, project an image to our clients and the public that is credible through consistency and adherence to the highest principals. ACEC/CT is as good as we collectively make it.”

Val Ericson, PE

*President, The DiSalvo Ericson Group,
Ridgefield, CT
26 person structural firm*

“The business of the profession requires that we maintain an edge on the competition and respond to changing market conditions. ACEC/CT gives us information that we might otherwise miss. Nowhere else can you get the business information you need in today’s market. ACEC/CT is always at the lead in keeping members ahead of the competition.”

Rod Bascom, PE

*Clough, Harbour & Associates, LLP
39 person civil firm in Rocky Hill*
